# BECOME A PREFERRED VENDOR FOR YOUR CLIENTS

Get the Punch-Out Site integration from ASI Computer Systems®.

SCHEDULE A FREE CONSULTATION TODAY!

Larger organizations use procurement systems to manage purchasing. Now, you can allow these customers to purchase products from your ASI Computer Systems eCommerce Web store and we'll help you integrate directly with their system.

Enjoy the benefits of:
• Reliable, accurate orders with real-time product pricing and availability.
• Better productivity with paperless orders.

Here's How It Works
1. The buyer visiting your Web store is authenticated, and the shopping cart is transferred back to the organization's procurement system for supervisor approval.
2. Once approved, a purchase order is automatically sent to you and a confirmation sent to the buyer.
3. Once the order has been fulfilled, an invoice is sent to your client based on their delivery requirements.
4. You'll get more sales!

Contact ASI Computer Systems for a consultation.
